FITZROY CROSSING INVITATION  
BOS INDIGUS BULL SALE 2021

**188 Specially Selected Bulls**  
Fitzroy Crossing Rodeo Grounds  
FRIDAY, 20th AUGUST 2021  
Commencing at 10am

SELLING IN ORDER OF:

Queenslanders – 33

Charbrays – 3

Red Brangus – 6

Red Brahms – 41

Grey Brahms – 36

Droughtmasters – 69

Northern Rural  
Supplies

A G E N T

# MAKE YOUR MARK WITH Marks-Min®

The **only** combined  
Trace Minerals **and**  
Vitamin B12 injectable  
for cattle in Australia, in  
a convenient single dose.

Available at your local rural store.

For more information visit [marksmin.com.au](http://marksmin.com.au) or call Boehringer Ingelheim Customer Care on 1800 808 691.

# Welcome

## FITZROY BULL SALE COMMITTEE

I am please again to welcome everyone to the Fitzroy Bull Sale event for 2021.

The past 18 months has had its challenges for everyone no matter where you live.

This again shows the commitment that our Bull Sale vendors have had to deal with. The huge success of the 2020 sales was even a bigger surprise due to the fact that only 2 vendors were permitted into the state to represent the balance of the group (due to COVID restrictions).

Not only do we still have that cloud hanging over our head, but the vendors have also been dealing with WA entry "issues" based on BJD testing proposed changes.

The commitment shown with all of these hurdles from the studs to keep giving the West Australian Northern Beef industry supplied with genetics to improve profits both short & long term is appreciated.

On behalf of myself & the Bull Sale Committee we wish all potential buyers & underbidders all the best for the sale & plenty of progeny out of your purchases.

Regards

Merv Wortley

President Fitzroy Crossing Sale Committee

"Ruby Plains" Station

Halls Creek WA 6770

Visit our live stream for the sale and register to use at: [nrsbroome.onlive.events/](https://nrsbroome.onlive.events/)

## **Outside Agents**

No rebate will be paid to outside agents.

## **Disclaimer**

The information contained in this catalogue is believed to be correct at the time of going to print. All care has been taken in its preparation, however no responsibility is taken for any inadvertent error or omissions.

## **Inspection**

Bulls will be penned by 7:00am on the day of the sale for inspection or by prior arrangement.

## **Refreshments**

A complimentary Breakfast is provided commencing at 7:30 am on sale day. A luncheon and refreshments will be available for sale on the day.

## **Auction**

All bulls will be sold under the NRS Conditions of Auction Sales. The Auction Price will be GST exclusive.

# Sperm Morphology

Morphology (anatomy) of the sperm has been shown to be one of the most important indicators of fertility in the bull and a very useful selection tool for improving herd fertility. Studies of Northern Australian herds, have demonstrated that in general bulls with >70% normal sperm had the highest calf outputs (Fitzpatrick et al, Animal Reproduction Science 71 (39-49)).

## ***What is sperm morphology?***

Sperm morphology refers to the shape, size and structure of the sperm. Sperm qualities and its The sperm are counted and 100 sperm are classed as wither normal or abnormal sperm being categorised into differing abnormalities ability to move forward and reach the egg (motility) is assessed crush side by the vet at the time of a bull test. A sample of the semen is placed into a small vial of preservative which kills, preserves and dilutes the sperm and other cells. The sample is later examined for morphology using a much higher power specialised microscope in a laboratory. The sperm are counted and 100 sperm are classed as with high normal or abnormal sperm being categorised into differing abnormalities.

## ***Why is sperm morphology important?***

Morphology results can predict the sperm's ability to get a calf and more importantly can pick up defects which may initially start to fertilise the egg but then fail to result in an ongoing pregnancy. Normal morphology has been demonstrated to be heritable, relatively repeatable (doesn't change much year to year), can be used to predict the number of calves the bull can produce and can even predict the fertility of his male and female offspring. The heifer's age at puberty and her time between calving and cycling again, can also be influenced by the morphology of her sire. The selection of bulls with high normal sperm morphology counts results in increased calving rates, tighter calving periods, reduced empty cows, increased weaning weights and faster rates of genetic gain. The stocking rate of bulls to females may also be lowered.

Bulls which do not qualify by morphology standards may still result in a large number of calves on the ground, but these calves may have come at a high cost. There may be an unacceptable high rate of empty or dry cows, and the cows may have lost one or two embryos during the mating season prior to maintaining pregnancy. The delays in achieving pregnancy result in smaller calves at weaning, and increased pressure on the cow to achieve pregnancy the following year as she has a short recovery time post calving.

### ***What about variations in sperm morphology results?***

Semen is sensitive to extreme temperatures, stress and diet, so morphology results can also reflect recent illnesses, transport stress, lameness and high grain diets, all of which may have temporary or permanent effects on fertility. As a result, repeat tests may be required on bulls with defects on the initial exam. Some bulls are more sensitive to these stressors than others and their morphology and fertility can be affected more easily than others in the same mob exposed to the same stressors. Overall, morphology in mature bulls is largely repeatable, so the majority of bulls will have similar results on repeat exam.

### ***What about young bulls?***

Young bulls may occasionally have defective sperm which reflect their sexual immaturity. In this case, the defective sperm count often progress to become normal as the bull matures sexually. Part of the testicle responsible for making important changes to the sperm necessary for fertilisation, may not mature to function effectively until some bulls are 15 months old. When it is not yet functionally normally, proximal droplets and other defects are seen on the sperm. Sperm with these droplets fail to bind to the egg. These defects should be diminished by 18 months of age or may reflect a slower maturing bull or another reason that their testicles aren't functioning properly.

### ***How can producers benefit from morphology testing?***

Only purchase bulls that have passed a morphology test. Ask to see the actual morphology test results and select bulls with higher percentage normal. Bulls which fail to be sellable at the morphology stage are an expense to the breeder, but the benefits of this step to the purchaser are considerable for their production and herd fertility. Breeders selling morphology tested bulls should be proud of their high standards which will be reflected in the long term quality of their product and in their reputation. Breed sales requiring morphology <50% higher standards than other sales. Retesting of some non-qualifying bulls may indicate the bull later improves to a satisfactory standard. Due to bull age and time limitations of some sales this retesting may be impractical and bulls may be withdrawn on the basis of initial test.

Barlyne has been focusing on supplying bulls to Western Australia since 1998, we base our breeding objectives and selection criteria on what we believe is required to perform well in the pastoral regions of WA. We concentrate on the need to produce bulls of sound temperament that are going to be able to perform in pastoral conditions. A large proportion of our breeding herd is now polled and we will continue to develop these genetics.

Regards  
Jim & Johnny Edwards  
Gayndah QLD

# Redline Brangus

Quality Red Beef

*Redline Brangus is located 180km west of Bundaberg, Central Queensland.*

## **At Redline we sell approximately 150 bulls annually.**

A small percentage of our seed stock will be prepared for sales. This year we are offering 6 sires at the Fitzroy Crossing on 20<sup>th</sup> August. These young bulls selected for sales, we place special emphasis on temperament, growth and over-all type. All sale bulls are assessed for motility and morphology prior to sale. These bulls are also DNA profiled, including polled/horned, registered with the Australian Brangus Association with Breedplan data. Scanning results showing EMA, Rib, P8 & IMF will be available on our supplementary sheet. Information and photos of these bulls will be available on our website [www.redlinebrangus.com.au](http://www.redlinebrangus.com.au)

All sale bulls are prepared in a grazing paddock where they have access to silage and are hand feed a small amount of bull maintenance pellets. Redline provides well covered bulls that are not over done. All bulls are constantly handled with horses, bike and worked through our yards, providing buyers with well mannered bulls that would suit any operation.

Also selling 8 sires at the Australian Brangus Association Sale in Rockhampton on 11<sup>th</sup> & 12<sup>th</sup> October, and 5 sires at the Monto All-Breed Bull Sale on 11<sup>th</sup> September

A large percentage of our seed stock is sold directly from the paddock. Like our sale bulls, our paddock bulls are selected on temperament, growth and over-all type. All of our paddock bulls have been DNA profiled, motility and morphology tested, and most of our paddock bulls are registered with the Australian Brangus Association and have Breedplan data.

Redline guarantees our bulls for fertility. Property inspection of our seed stock is always welcome.

Kind Regards  
**Peter & Kristine Dingle**

# SAMARI BRAHMAN & QUEENSLANDERS

Samari Brahman joined Australian Brahman Breeders in 1986. Samari is located 120kms south of Roma in South West Queensland. Samari have been breeding red Brahman for 40 years prior to this. We are a family run business. Keith and Annabelle's daughter Sally, husband Ben and family run their Samari S herd alongside the Samari Brahman herd.

Choosing to upgrade through the appendix as opposed to buying in outside stud cows has been the foundation for Samari's solid breeding herd, always breeding red

Brahman and exclusively using polled bulls in the last 7 year's. This is in response to the high market demand for these genetics.

Samari's herd has an increasing percentage of genome tested predominately polled animals each year being born and an increasing number of PP bulls for sale.

Samari has always bred pink-nosed, red Brahman and we recently seized the opportunity to expand our herd's diversity by introducing "Queenslander" cattle to our already solid pink-nose, base herd.

At Samari we aim to breed high yielding beef cattle with stud appeal and a quiet temperament being our number one priority.

The Samari herd are reared with what the season offers making our cattle strong and resilient. We feed at weaning and prior to sales.

The Samari Brahman family welcomes paddock sales and inspections, being only too happy to introduce you to our cattle.

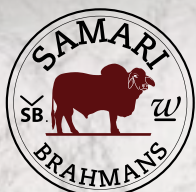

Annabelle & Keith Wilson (07) 46 265 412 • 0487 605 937

Sally & Ben Sweetland (07) 46 265 418 • 0418 157 685

PURCHASER..... \$ .....									

The purchase of Cherokee Ole Shannon and various cows from Avondale, Brahmleigh and Hillview Studs was the beginning of Rodlyn Brahman Stud, established by Rodney and Lyn Sperling in the mid 1970's. We source our sires to produce good temperament, fertility and beef.

***"BRED FOR BEEF NOT FED FOR BEEF"***

Currently our breeder numbers are 10 Charbrays, 50 Droughtmasters, and 100 Brahmans.

The Charbrays are bred using pure bred Charolais bulls from Moongool, Gunnadoo over pure bred Rodlyn Brahman cows.

Our E.T. programmes are always on the go in order to try new sires.

We sell at Rockhampton, Roma, Blackall and Fitzroy Crossing sales.

We always have bulls and females for paddock sale and buyers are always welcome.

## RED BRAHMAN

Muan sends bulls each year to Fitzroy Crossing, Rockhampton Brahman Week (Average \$16,718 for 16), Big Country (Average \$17,000 for 10) and into WA Stations. Many of our sales are to repeat buyers.

Careful selection of sires for paddock sales and for IVF and AI has seen Muan Brahman continue to product cattle with structural soundness and a good temperament. A big percentage of our cattle

have polled DNA. New sires purchased are Brahrock Rayons (\$32,000) and Somerton Lazarus (\$85,000) in conjunction with Barlyne.

New genetics introduced in our Queenslander cattle are showing results with some very promising weaners.

Thank you for your support. Visitors are welcome to call in anytime to inspect our cattle and sale bulls.

# BAR BOOT BRAHMANNS

*Castle Livestock*

Bar Boot Brahmans was established in 2006 by the Castle Family. It is located between Kingaroy and Dalby based at our home block Eden. Our aim was and continues to be to breed quality bulls, meeting client requirements and consistently improving our bloodlines and genetics.

Our bulls are early maturing, fertile, structurally sound and have excellent temperament.

Quiet, sensible cattle with proven genetics that will work in with your stock program.

Bulls have been successfully marketed through various sales including Rockhampton Brahman Week, Fitzroy Crossing and through paddock and private sales.

On inspection you can expect uniform, gentle, beef type females with tidy udders and a consistent calving history.

The Fitzroy sale is an important venue for us to be able to showcase our bulls.

All bulls will be fully accessed before the sale, with the data available on sale day.

Paddock sales are available year round. Inspections are welcome.

# RAGLAN BRAHMANS

# A1.

The stud was registered in 1994 to Andrew & Roxanne. When they married in 1985 it united the Beak/Olive family from Marlborough with the Kirk family from Yenda, Gayndah. These two original families began breeding Brahmans in the early 1950's, which gave Raglan Brahmans a knowledge and history of breeding Brahman cattle from strong genetic bloodlines.

With the strength of these genetics and the quality of the cattle joined together from the original studs and the knowledge we have gained over the years from showing cattle, Raglan has fast become a well known identity of its own.

Raglan is an intensive bull producing business, through the use of genetic bloodlines, AI and IVF programmes, we continually strive to produce an animal that meets all market requirements.

We are AQIS accredited with semen and embryos available for overseas programmes.

We market our bulls via a number of auctions, these include Rockhampton Brahman Week, All Breeds Summer Sale, Ponderosa Sale in the N.T. and in Charters Towers the Wilangi and Big Country sales.

Raglan sell both registered and commercial bulls & females to overseas clients from various countries, including semen packages and embryos from our registered Raglan Sires.

We continue to support Northern Australia by bringing our sale team to the Ponderosa sale in Katherine, for the last 30 years.

The majority of the operation's high quality bull sales are to long time valued repeat clients. Raglan bulls are always available for inspection and sale.

We invite you to visit our operation and inspect the raglan herd we are proud of. We hope we can work with you to meet all your breeding requirements.

Follow Us  
on Facebook 

Ahern Brahman is a family owned and operated business in the North Burnett Region of Queensland.

Established in 1999 our aim is breeding quality bulls that will thrive and reproduce in their given environment.

We focus on selecting genetics that are going to mirror growth rate, fertility, bone, temperament, structure, and correctness.

Through AI and IVF programmes, we have achieved positive results which have been especially reflected at the annual

Brahman Week Sale in Rockhampton, averaging \$22,730 from our line-up of 13 bulls in 2020.

We ventured to Charters Towers for the first time earlier this year with 7 bulls and averaged \$13,142.

This year we will be proudly offering 15 bulls at the Fitzroy crossing bull sale in August. Enquiries are welcome as well as on property inspections.

Welcome...

SC Droughtmasters (formally Comanche) is located one hour North of Rockhampton on the Fitzroy River. Cattle are bred on coastal country with a strong emphasis placed on fertility and genetics with moderate maturity, quite temperament and structurally correct. Females are expected to calve annually, during a four-month joining period and are recorded on Droughtmaster Group Breedplan.

11 bulls will lead this years' sale team, with 10 bulls being polled and 1 scurred.

All bulls have full DNA data showing pompies free, parent verification and are poll gene tested, with EBV data and semen morphology test results.

All cattle are handled with horses, bikes, dogs and children.

For full details please visit our website [www.scdroughtmasters.com.au](http://www.scdroughtmasters.com.au)

We look forward to catching up at this years' 2021 Fitzroy Bull Sale and please feel free to visit if ever in QLD. Take care.

## SIRES REPRESENTED

- **3 x Lisgar Dallas (PP)**, progeny has very good growth, carcass and fertility EBV's and is throwing consistently polled progeny with great breed characteristics.
- **4 x Clonlara 17200**, throws frequently polled, moderate maturing cattle that are easy doing and have a docile temperament.
- **2 x Kenlogan Thursby (PP)**, produces clean coated, tidy sheaths and a higher content.
- **2 x Skye Delhi**, recently introduced to the herd, this is his first crop of calves for sale. Delhi has produced well-muscled and clean coated progeny.

**SC Grazing Pty Ltd - Steve & Claire Farmer "Mt Elsa" Canoona Qld 4702**

# Valera Vale

## DROUGHTMASTERS

### - Valera Vale Droughtmasters - Bred to perform out here

Valera Vale is a commercially focused enterprise marketing over 500 non-sense herd bulls annually. Our aim is to breed functional, environmentally adapted cattle that can not only grow fat in the good seasons but survive and reproduce in the all too frequent droughts. We are based on several properties throughout Southern Qld ranging from ticky coastal forest country to Buffel grass pastures in arid outback Qld. Our main property is located at Charleville in the South West Qld region known as heart break corner for its regular droughts.

Aside from the obvious non-negotiable standards of structural soundness and temperament we focus almost entirely on putting selection pressure on our herd for fertility. We have followed this track for 50 years. Our theory is that only sound adapted cattle can thrive in our environment enough to conceive and rear a calf annually through floods and droughts. We view the hard times as an opportunity to further advance the ability of our herd to drive profitability in yours. The result of

our selection process is a higher Brahman content herd with growth rates and reproductive rates well above breed averages and suited to diverse markets and conditions – a combination of Bos indicus adaptation with meat quality, poll genetics, reliable temperament, and high fertility.

In addition to being morphology tested our 2021 draft is tested clear of Pompey and Pestivirus diseases, as well as being DNA sire identified, and poll gene analysed. This year's draft has been selected for the catalogue on Dam and Sire fertility records and Genomic analysis. The Valera Vale herd is one of the herds being used for Genomics research by Prof Ben Hayes and his team from the University of Qld, with the younger breeders being DNA analysed and reproductive performance recorded to identify the gene sequences associated with hard to measure but economically important traits.

Early Genomics data is available for the draft.

# By-Mingo Droughtmasters

By-Mingo Droughtmasters is run by Don & Robyn Robertson in the Nth Burnett. We have been running Commercial breeders since 1991 and the By-Mingo Stud was registered in 2003.

Our herd now comprises 160 Registered breeders run in 5 single sire mating herds. The bulk of our breeders are run on forest country and are exposed to ticks and Lantana.

Being a smaller operation, every calf counts so every cow must wean a calf every year regardless of the season. Fertility and natural temperament are paramount.

Our cattle are handled with horses

& motorbikes and with & without dogs. Weaners are yard weaned and tailed out with horses and then educated to bikes & dogs. We sell approx. 40 bulls per year with the majority of them straight out of the paddock.

A line of select bulls are also sold at the Bunya Sale and National Sale in September every year. From weaning the bulls are grown on dryland grass pastures and then at about 12-15 months of age are put onto a Leucaena/grass pasture.

They are given a silage-based ration in the last 2-3 months prior to sale to give them a more polished sale condition. We want our bulls to still have that browse

& forage instinct and not to rely on a grain feeder. Bulls are to be naturally quiet, good on their feet & legs and display good carcass attributes and are bred from our reliable fertile females.

All bulls are semen & morphology tested, Pompes & Pesti tested Negative, Horn/Poll DNA tested and have Full Parental DNA Verification. Vaccinations included: 7-In-1, 3 Germ Blood, Botulism, Lepto, Vibrio, Pesti & 3 Day Sickness.

**We have sold bulls to South Australia, the Northern Territory and been selling into Western Australia since 2006. We first sold at the Fitzroy Sale in 2008.**

# LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

## CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
- (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and conditions by bidding at auction.
2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors, agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.
- (b) When used in these terms the expressions "companion animals" means all animals originating from a property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
3. The following applies in interpreting these terms and conditions:
  - (a) The following words have the following meanings:
    - Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;
    - Livestock means animals auctioned pursuant to these terms and conditions; and
    - Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions
  - (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
  - (ii) plus any GST added in accordance with clause 12.
- (b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

## CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
7. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interests of the vendor and need not give reasons for doing so.
10. A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:
  - (a) the purchaser's name; or
  - (b) the bid card number which identifies the purchaser; or
  - (c) the name of the person on whose behalf the successful bid was made; and
  - (d) the Property Identification Code (known as the "PIC") of destination.
12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.
13. The vendor warrants that the:
  - (a) vendor has (or will have) the right to sell the livestock at the time of delivery; and
  - (b) buyer will obtain title on completion of the buyer's obligation under these terms and conditions.
14. If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in a written agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.
16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.
17. (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
- (b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.
- (c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.
18. (a) Subject to this clause the sale is complete on the fall of the hammer.
- (b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:
  - (i) delivery is taken by a representative of the buyer;
  - (ii) departure of the animal from the purchaser's delivery pen; or
  - (iii) one hour after the last animal is:
    - a. in the case of pre-sale weighing, sold; or
    - b. in the case of post-sale weighing, weighed.
- (c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.
- (d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.
- (e) This sub-clause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, through delivery to and from the scales, to the buyer's delivery pen and on to the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This sub-clause does not apply if the agent makes an announcement to that effect prior to sale.
19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.
- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.
- (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be

supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner the female was pregnant on that date.

- (d) For cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard account to the purchaser's account on the NLIS database no later than midnight on the day of the sale.
- (e) Where livestock have a food safety or market eligibility status derived from the NVD and/or the NLIS/ERP database, the agent will inform the buyers by presale catalogue in conjunction with vendor branding and/or announce the status prior to the offering of those lots.
20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
  - (a) does not acquire title to the livestock;
  - (b) holds the livestock as bailee only for the vendor;
  - (c) must act in a fiduciary capacity in its relationship with the vendor;
  - (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
  - (e) is responsible for the safety and well being of the livestock;
  - (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the vendor in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
  - (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
21. The buyer agrees that:
  - (a) clause 20 creates a registrable security interest under the personal Property Securities Act 2009 (PPSA);
  - (b) the buyer acknowledges the rights of the vendor (and/or the agent is clause 23 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
  - (c) the livestock are collateral for the purpose of the PPSA;
  - (d) to the extent permitted, the buyer waives any right the buyer has under the PPSA to receive notices;
  - (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to these terms and conditions; and
  - (f) if payment is not made in accordance to clause 15, but delivery is made to, or possession obtained by, the buyer or its representative, interest may be charged at the rate usually charged by the agent for overdue accounts on any amounts which remain owing at any time.
22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.
- 23.1. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.
- 23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- 23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.6 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.
- 23.4. Title to the livestock does not pass to the agent or a nominee of the agent unless the agent, by written notice to the vendor, notifies the vendor that it is to be transferred to the agent or a nominee of the agent.
- 23.5. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
  - (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
  - (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.
- 23.6. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).
- 23.7. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
  - (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
  - (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- 23.8. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.
- 23.9. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:
  - (a) by this clause 23, other than as it expressly provides; or
  - (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.
- 23.10. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.
- (b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
- (c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
25. (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.
- (b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and treat livestock in accordance with any other or additional requirements of animal welfare legislation specific to the State or States in which livestock are consigned, managed, received, transported and treated in the course of the auction process.

## CHAPTER THREE -

### VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are

slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

27. The warranty of a vendor is that livestock and their companion animals offered for sale at auction:
  - (a) pass DAFF and other regulatory authority requirements and inspections at the time of slaughter; (DAFF refers to Federal Government Department of Agriculture, Fisheries and Forestry);
  - (b) are of merchantable quality;
  - (c) carry an NLIS device in accordance with State law;
  - (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in the National Vendor Declaration, the livestock will have those characteristics or will be fit for the particular purpose or market; and
  - (e) all information in any National Vendor Declaration provided by the vendor is true, complete and correct in all material respects.
28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.
29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.
30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:
  - (a) the buyer will be entitled to delay payment for the price of all livestock in that lot; or
  - (b) the vendor has the option, at the vendor's cost, of collecting the companion animals and returning them to the vendor's property; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.
32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
  - (a) any error, by the auctioneer, of transcription of information from the National Vendor Declaration completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
  - (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
  - (c) any failure by the auctioneer to disclose prior to bidding, and in the presale catalogue, that the vendor has failed to provide a National Vendor Declaration that is complete in all material aspects.

## CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by the relevant government department. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the certificate issued by the relevant government department, existed prior to the fall of the hammer.
35. A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
  - (a) a certificate is issued by the relevant government department which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
  - (b) the certificate is received by the selling agent either in its original form or by fax by 5:00pm on the 7th day after the fall of the hammer; and
  - (c) if the condemnation is due to chemical residue the certificate follows testing in a laboratory approved by the relevant government department which establishes maximum residue limits in excess of the Australian limit.
37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of the following:
  - (a) bruising,
  - (b) fever,
  - (c) partial condemnation, or
  - (d) emaciation.

## CHAPTER FIVE - NOTICES REQUIRED BY STATE LEGISLATION

### NSW Legislation

Property, Stock and Business Agents Act 2002 Warnings Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (i) to abstain from bidding; or
- (ii) to bid to a limited extent only; or
- (iii) to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

### Tasmanian Legislation

The auctioneer must not appear to acknowledge a dummy bid. A buyer must not give, agree to give or offer a gift or other consideration to a person for abstaining from bidding and a person must not accept any gift or consideration for abstaining from bidding.

A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition.

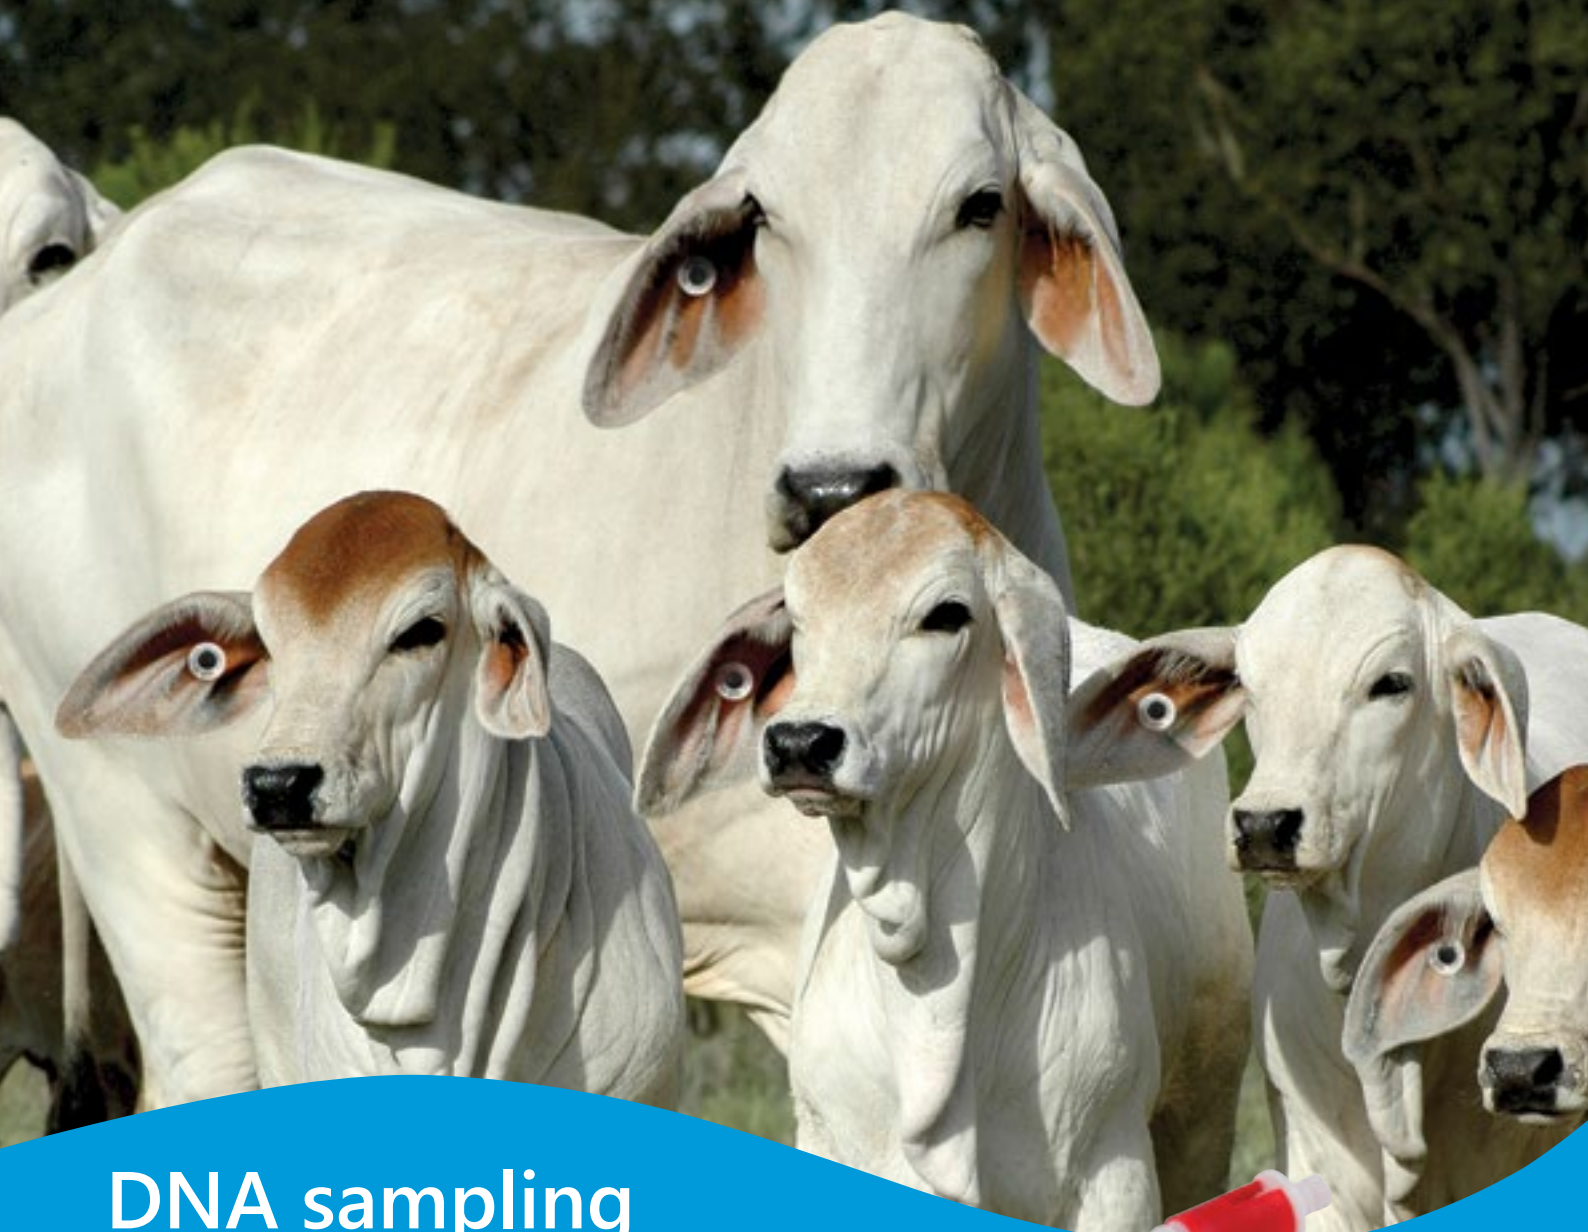

### Western Australian Legislation - Auction Sales Act 1973 s31 NOTICE

It is an offence to:

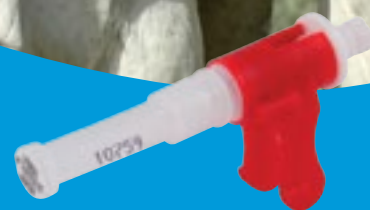

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- (ii) abstain or agree to abstain from bidding as a result of such a promise;
- (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.

# Identify, trace, record.

## DNA sampling with tissue sampling units (TSU)

- ✓ Fast, high performance sample collection
- ✓ Clean, uncontaminated sampling
- ✓ Minimise retesting
- ✓ Sample integrity
